THE NEW JEFFERSON HOSPITAL
OPENED JUNE, 1907

1915	
Accidents,	10,236
Admissions,	7,725
Dispensary, new cases,	25,219

REPORT
OF THE
JEFFERSON HOSPITAL

For year ending May 31, 1915

Thirty-eighth Year

PHILADELPHIA

1915

The JEFFERSON HOSPITAL receives the injured and sick irrespective of race, nationality or religion.

Patients desiring admission should apply at the Hospital between 8 A. M. and 5 P. M., or to any member of the Medical Staff.

Cases of recent accident occurring in Pennsylvania are admitted at any hour of the day or night.

The insane, and patients suffering from contagious diseases or alcoholism are not received; except when temporary relief is possible, incurable cases are not admitted.

The Maternity Department is located at 224 West Washington Square. Women are received and cared for during confinement, or attended at their homes.

The Department for Diseases of the Chest is located at 236 and 238 Pine Street. Patients with advanced pulmonary tuberculosis only are admitted to the wards.

Board of Trustees

WILLIAM POTTER,
President.

The Year's Work

A SUMMARY

Patients treated, 7,725

Surgical operations, 4,779

The Maternity has administered to 1,247 women; 449 babies

The Department for Diseases of the Chest has admitted 272 patients to wards and treated 2,499 in Dispensary

Dispensaries, 25,219 patients; 103,622 visits

Prescriptions filled in Dispensary Drug Store, 28,559

In all public departments, 40,498 patients

Average patients per day in all public departments, 652

ONE OF THE MEDICAL WARDS

The Jefferson Hospital

This report deals with the thirty-eighth hospital year and records the eighth year of the new Jefferson Hospital as a most active and charitable one. The need for this large institution, both local and state wide, in the center of a busy, populous, industrial and commercial section of the city of Philadelphia has long been established.

Since the occupancy of the new Hospital building, June 24, 1907, 47,677 patients have received 751,819 days treatment. 72,319 patients were treated in the Emergency Ward, and the Dispensary afforded 897,210 consultations to 198,739 patients. Of the patients admitted to the wards, 80.5 per cent. were absolutely free, and the remaining 19.5 per cent. contributed approximately one-half of the actual cost of their maintenance.

When the new Hospital building opened its doors to patients it was thought that the institution would be amply capacious for many years to come; only eight years have elapsed and the Jefferson Hospital is confronted with the problem of affording care to a constantly increasing number of sick and injured.

In 1913 the Board of Trustees, recognizing the need for a separate hospital for advanced cases of tuberculosis, established at 236-238 Pine Street a Department for Diseases of the Chest, with a capacity of forty beds. Here, modernly equipped and suitably located in the slums of the city, proper care and supervision are afforded the poor and needy afflicted with pulmonary tuberculosis. The patients are interviewed in the dispensary of the Hospital by the Social Service Department, which renders to the physician the result of a study of the patient's social condition. With these facts the physician determines whether the patient is to be treated in the dispensary, admitted to the Hospital or sent to the country.

A comparison of the year's work completed May 31, 1915,

with that of the first year in the new Hospital ending May 31, 1908, reveals the following gratifying results. An increase of 111 per cent. in the number of patients admitted to the Hospital, and an increase of 89 per cent. in the number of days of treatment.

Not only has the amount of work increased because of the larger number of patients, but the character of the work is of a wider scope. Physicians and the public are justly demanding the most modern, thorough and exacting service of every hospital, owing to the marvelous progress and rapid strides in medical research which heretofore have never been equaled.

The hospital's first and foremost duty is the care of the sick and injured; second, the instruction of physicians and nurses who are to serve the communities in which they live; and third, the instruction of its patients in preventive medicine and hygiene.

Prior to the last decade, hospitals have only recognized the disease from which the patient suffered. The duty of the hospital began when the patient entered the hospital and ended the moment the patient was discharged. To-day a hospital failing to investigate the social condition of the patients is failing in its duty.

The consideration of the patient's physical and mental environment is as necessary to the intelligent and scientific treatment of the disease, from which he or she is suffering, as is a study of the symptoms and signs.

Tuberculosis, heart disease and other chronic affections are frequently but incidents in a life full of misfortunes,—as ignorance, poverty, idleness, intemperance, loneliness or physical incapacity.

Work of the Past Year

The work for the past year as compared with previous years, shows an unusual increase in the number of IN-PATIENTS CARED FOR. Truly every available resource has been seized upon and utilized to meet the additional demands made upon the Hospital. One has to reflect but

a moment to account for the increase. The bloody conflict in the East, and the industrial unrest in this country have exacted their toll in our land. The manner in which the philanthropic and charitable citizens have responded, both by rendering personal service and contributing financially, is only excelled by the great amount of good which has thereby been accomplished.

Mrs. Lucy B. Henderson, through Prof. H. A. Hare, gave \$6,500 to the Jefferson Medical College to purchase radium. A department of Radium-Therapy has been established to conduct clinical and laboratory investigation with radium, as used in the treatment of cancer and other diseases. This department is very active. More money is needed to purchase additional radium. It is hoped that others will be equally as beneficent as Mrs. Lucy B. Henderson and thereby further the excellent work that is being done in this department.

Concerning Statistical Report

The following data gleaned from the statistical report (page 59) is of sufficient importance to be reiterated:

During the year 7,725 patients were admitted to the Hospital, an increase of 10 per cent. as compared with last year. The 7,725 received 122,962 days of treatment, an increase of 13 per cent. over the previous year. The average number of patients in all departments of the Hospital has been increased from 685 per day in the preceding year to 708 for the year just closed.

Wards

During the year 5,043 patients were admitted to the wards, as compared with 4,516 patients in the previous year. These patients received 102,850 patient day treatments, as compared with 89,075 patient day treatments in the previous year. It will be noted that the average days per ward patient in hospital has been 18.8 days, somewhat longer than the average stay of 16.8 days in the preceding year. This is

accounted for by the fact that the average stay in the hospital for advanced cases of tuberculosis at the Department for Diseases of the Chest is fifty days. In the operating rooms for ward patients, 3,881 operations were performed this year as compared to 3,614 operations in the previous year. For comparative cost of maintenance the reader is referred to financial report (page 62).

Charitable Work Being Done

OF THE PATIENTS ADMITTED TO THE WARDS OF THE JEFFERSON HOSPITAL, 83.8 PER CENT. WERE ABSOLUTELY FREE. The 13,504 consultations in the emergency ward and the 25,219 patients admitted to the dispensaries, who made 78,403 return visits, represent additional free service cheerfully given to the deserving.

Private Rooms

Patients desiring the exclusion or luxury of a private service, may obtain in the Jefferson Hospital room with or without bath, single or en suite, and so arranged that visiting relatives or friends may occupy apartments immediately adjacent to the patient.

Electro-therapeutic and hydro-therapeutic application, private reception rooms and parlor, private operating room, sun parlor, diet kitchen and facilities for private care of maternity cases are also available.

Special nurses are supplied at reasonable rates, the hospital making no extra charge except for board. The hospital is equipped to care for eighty-six private and semi-private patients.

Provisions for the Professional Care of Patients

The fifteen departments of the Jefferson Hospital, including the dispensaries, are under the immediate supervision of 23 members of the visiting staff and over 135 assistants.

PRIVATE ROOM

The Resident Staff comprises 15 physicians, including a Chief Resident Physician. Nursing is supplied by a Directress of the Training School, Assistant Directress, 13 Graduate Nurses and 110 Pupil Nurses.

The institution maintains two fully equipped pharmacies at the general hospital and one at the Department for Diseases of the Chest, supervised by two registered managers and three qualified assistants. The magnitude of this service may be appreciated when it is stated that exclusive of the house and operating room service 28,559 prescriptions were filled last year.

The Jefferson Hospital maintains two automobile ambulances which respond to calls received from every section of the city and suburbs. Patients coming from a distance are speedily conducted to the hospital.

The Needs of the Jefferson Hospital

The needs of the Jefferson Hospital are the Public's needs. No properly managed institution ever reaches the limit of its usefulness. The needy, sick and physically incapacitated are ever with us. The amount of good accomplished is limited by the funds available, and by this alone.

Hospital Mortgage

Upon the hospital building which, including furnishings and equipment, cost a million and a half dollars, there is a debt of \$385,000, the interest of which constitutes a heavy fixed charge, and consequently a diversion of resources otherwise available for maintenance. It is the hope of the Board of Trustees that the charitably inclined might, by subscription, endowment or other benefactions, assist in lightening this burden.

New Maternity Building

This Department is accomplishing a great amount of good under difficulties incident to crowding and insufficient space (see page 39). It is sincerely hoped that some bene-

factor, seeking an avenue through which he may do a great service to suffering humanity, may supply funds necessary to the construction and endowment of a modern, fully equipped department.

Department for Diseases of the Chest

The Jefferson Hospital Tuberculosis Department admits only absolutely destitute and advanced cases of pulmonary tuberculosis. That there is definite need of this department of the hospital is evidenced by the many applications for admission and the constant large waiting list. The Department will be compelled to close the wards for the summer months because of lack of funds for maintenance. It is earnestly hoped that this appeal will come to the notice of the charitably inclined who will give the necessary financial aid to maintain this department and thereby continue the absolute free care heretofore given to all deserving advanced cases of pulmonary tuberculosis.

Among the purposes for which endowments are desired are the following:

Social Service Department of the Hospital.

Rooms in the Hospital.

Any of the wards in the Hospital or beds therein.

Children's Department of the Hospital.

Nurses' Home.

Operating Rooms of the Hospital.

Laboratories of the Hospital.

The names of the benefactors are published in every annual Hospital report and further recorded by suitable bronze tablets erected in the Hospital.

ONE OF THE WARDS AT THE DEPARTMENT FOR DISEASES OF THE CHEST

Department for Diseases of the Chest

The Department for Diseases of the Chest was acquired in 1913 by the purchase of the buildings formerly occupied by the Henry Phipps Institute and located at 236-238 Pine Street. These buildings were completely renovated and modernized at a cost of over \$20,000, and in their present condition afford every facility for the efficient care of patients suffering with diseases of the chest. The new department contains ample space for dispensary treatment of ambulatory cases, while the wards provide forty beds which are devoted to the care of those suffering with advanced pulmonary tuberculosis.

The work of the department deals largely with the general problem of tuberculosis. The need for such a department doing this sort of work must be evident when it is recalled that one in every ten persons dies from tuberculosis, and in the State of Pennsylvania alone, 9,000 persons die annually from this disease. The incontrovertible fact that the Department for Diseases of the Chest of Jefferson Hospital is fulfilling a need of the community is evidenced by the long waiting list of patients applying for admission to its wards, which have been filled to capacity since the opening. One of the fundamental methods which authorities agree is necessary if we are to make any headway whatever in the control of the "Great White Plague" is the isolation and segregation of the advanced indigent and dangerous consumptive. For this purpose there is a total lack of hospital facilities in the State of Pennsylvania. The Board of Trustees of Jefferson Hospital, always anxious that the institution should take an active part in matters of public health, and realizing fully that special tuberculosis work meant added financial responsibility—a responsibility all the more weighty in view of the current deficit in its funds—felt that so important a community need should be considered, and proceeded with organization of the department in the hope that the State of Pennsylvania and charitably inclined persons would contribute toward its support.

The work is a charity in its truest meaning, and its scope, like that of the general hospital, is limited only by the funds available. In addition to the medical care of the patient in the wards and in the dispensary, the home condition is investigated by trained nurses and workers acting under the direction of the Social Service Department. The members of the family not yet victims of the disease are given directions to secure their health. Those exposed to the patient are directed to report to the dispensary for examination to discover incipient cases. When incipient cases are found sanatorium care is arranged for. Arrested cases are taught how to prevent relapses. The abnormalities of environment which predispose toward disease are corrected.

The activities of this department are humanitarian in the widest sense. During the past year 272 patients were cared for in the wards; 13,625 patient days treatment were administered; 2,499 dispensary visits were made by out-patients and 2,277 visits were made by the social workers to the home.

The Social Service Department

The Social Service Department was organized April 15, 1912, Miss Annie Hinchman making it possible through funds contributed by herself and her friends. There was then on the staff one worker and later a stenographer on half time. The value of the work soon became apparent and the Department has rapidly progressed, and in this, the beginning of its fourth year, the staff consists of five workers, a secretary, two volunteers and two students.

The Department is under the supervision of the Trustees, and has a Social Service Committee of twelve women, a Sub-Committee of the Women's Auxiliary of the Hospital, who manage and enthusiastically support the work.

The aim of the work is to supplement that of the hospital and dispensary. It is an admitted fact, proved by the rapid growth of Social Service Departments in connection with the leading hospitals throughout the country, that medi-

cine is not complete without a study of the social background of the patients and remedial measures that follow.

Medicine to become progressive must be preventive, and to be preventive, the underlying causes for illness and disease must be sought and remedied. It is here that the Social Service Department is of value.

It has been the policy of the Department in the past to accept cases referred from all Departments of the Hospital or Dispensary. The necessity for Social Service having been so rapidly recognized by all Departments of the institution, has thrown much more work on the Social Service Department than it well can do.

A worker has been placed in each medical clinic during dispensary hours. Here she takes a slight social history on each case, such as the medical history sheets call for. This brings patient, worker and doctor into closer contact, and if social service is indicated the case is taken up, and when the worker visits the home she is not a stranger.

A worker also devotes her entire time to the work of the children's clinic and is always present during the dispensary hour. All children two years and under are followed into their homes and the doctor's instructions are carried out. The mothers are taught hygiene and the general care in the preparation of feeding formula. In addition, the social problems, and in most cases there are many, are investigated and solutions offered. These cases are kept under supervision until their fifth year, and visited from time to time as indicated by the intelligence of the parents of the child.

The doctors feel keenly the inadequate care provided for chronic cases and the harm done to a child from drifting around from clinic to clinic—coming under the care of many different doctors, whereas a child suffering with certain kinds of heart disease, might be cured after a number of years, if systematically followed up and kept under the constant direction of one physician. It is quite possible for the children's worker to accomplish much in a field of this sort

toward the permanent cure of a child who otherwise would remain handicapped and a burden to the community.

The lack of a sanatorium where children may go who suffer with tuberculosis, puts a very heavy drain upon the time of the worker, who feels that she is not serving her patient or the community unless she follows these cases closely.

The Department for Diseases of the Chest is most satisfactorily covered by the Social Service Department. Two workers devote their entire time to the work of the Chest Department. Every case that comes to the Hospital or Dispensary is a Social Service case. The sociological problem of every case is carefully studied and recorded, and finally bound with the medical records. Hygiene and the prevention of tuberculosis is taught in each home from which a case comes, and each member of the family is brought to the clinic and examined, and, if diseased, put under immediate care. Milk and eggs are supplied to the needy, and the social agencies of the city co-operate with the Department, giving relief when indicated, and helping to carry out the social programme planned to reap the greatest good to the family.

It is our hope to have a Social Dietitian, who will take up all cases where poorly chosen or improperly prepared food is the cause of the complaint bringing the patient to the hospital. It will be her duty to go into the homes of such cases and instruct in the purchase and preparation of food and teach housewives the art of cooking.

Although splendid progress has been made, still too much work falls to the lot of each worker. The real value of the work will never be proven until each worker has time to do all that is possible to be done and then to follow the case carefully to ascertain the result. The value of the work can be estimated by the following statistics:

Number of different sources of cases.....	53
Number of new cases, year ending May 31, 1915.....	2110
Number of visits to the homes of cases.....	4931
Number of consultations held in interest of cases.....	4631
Number of letters written.....	2019
Number of co-operative agencies giving assistance.....	140

SECTION OF CHILDREN'S WARD

And in an isolated case, what an analysis of the above figures may mean in actual work, will be seen in the following case:

The doctors from the children's and medical clinics referred the family of B—— to the Social Service Department for the following reasons: The doctor advised a change of employment for Mr. B—— on account of failing health. He was a laborer, carrying heavy pipes all day. Mrs. B—— was referred for milk and eggs as she was suffering from incipient tuberculosis, and the children were referred for nursing care in the home. Instruction was given to the mother in the prevention of the spread of specific vaginitis from which both children were suffering.

The family was visited and deplorable home conditions were revealed. The home consisted of two rooms on the second floor of a frame house in a poor neighborhood. The furniture consisted of a bed and table and two chairs, bought on the installment plan, an old bed without a mattress for the children, several wood boxes and a small gas stove. The family were in debt, had no money for food or gas or the next installment on the furniture.

The case was referred to the Society for Organizing Charity, asking them to provide nourishing food for the family. The Visiting Nurses were called in to carry out the treatment offered for the children and Mr. B——'s employer was visited with the hope of securing lighter employment for him. This visit revealed that Mr. B——'s domestic troubles were to account for his ill-health as much as hard work, and the employer thought even more. It was revealed that he had borrowed money to bring his wife and children from a distance, and with a small wage was struggling to keep up his home and pay back the money. He had become discouraged, and quarreled with his wife. They had each other arrested and afterward returned to live together, but the man was leading a life which denied him sleep and rest and kept him out late at night. In view of these facts, the doctor thought best that the man be employed, even at hard work, and, on his next visit to the clinic, instructed him

to return to work, and had a talk with him about the real cause of his failing health.

With continued friendly visits, the conditions have been greatly improved. The Department has secured an extra bed and mattress, and tided them over several crises, and at present they are living together. The children are much improved. The mother has been taught how to care for them. The mother's health is improved, and her husband has not lost a day's work. Mrs. B—— has returned to her church, although her husband has not.

This case illustrates how differently a case may be handled when all the facts become known, how further evils are prevented and how outside agencies come to our aid.

Thus it is not difficult to understand the value of Hospital Social Service work when the 2,110 cases were referred to the Social Service Department for help which the hospital or dispensary is unable to give, and which, if the community is to be served, and the full value of what the hospital gives is not to be an economic loss to both hospital and patient, the work and treatment must be carried on adequately in the homes or other institutions, sometimes for months after this hospital has done all it is able to do.

The Social Service Department is of value in aiding the physician in his diagnosis and treatment by investigation of the conditions; and making available the resources of the city when assistance is needed; and by co-operating with all departments in restoring a patient to complete efficiency; and to carry the educational influence of the Department's work into the home. The work may fall into the following divisions which will show how the Department aims to be helpful:

For the destitute, we make home visits, aid them to find employment, give loans, legal aid and refer to relief agencies.

Convalescent care; obtaining admission to suitable convalescent homes and following the results; providing carfare when necessary and accompanying to train, helping to get

re-established on return, if out of employment or in destitute circumstances.

Homeless; referring to temporary homes, finding employment or a friend.

Attempted suicides; friendly interest, investigation, aid in starting anew.

Deserted or unmarried mothers; convalescent care, employment with child, legal aid in getting support for child.

Immigrants; deporting when dependent or if for the benefit of their health they should return home, communicating with friends, accompanying to trains or getting tickets.

Incurables; helping them to get into a permanent home.

Reports; getting diagnoses and giving reports to co-operative agencies.

And there are many other divisions that the cases may come under but the above suffices as an illustration.

The need for Hospital Social Service work is no longer questioned. The best methods to use in obtaining the best results is in question and it is to be hoped that the doctors and social workers will work together with the end in view of establishing such standards in Medical Social Service as will be a stepping stone toward that end for which we all work—a better world in which to live.

The Women's Auxiliary

MRS. CHARLES M. LEA, *Chairman.*

MRS. HOBART A. HARE, *Vice-Chairman.*

MRS. PHILIPPUS W. MILLER, *Secretary.*

MRS. FRANK S. EVANS, *Treasurer.*

The Women's Auxiliary comprises three general committees—Hospital, Maternity and Nurses' Home. The Report of the Maternity Committee is included in that of the Maternity Department, beginning on page 42. The following reports have been submitted by the treasurer and chairmen of the respective sub-committees.

Hospital Committee

MRS. ROBERT E. HARE, *Chairman.*

This committee is especially devoted to the welfare of the general hospital. The many details are entrusted to sub-committees, the members of which give personal attention to the public wards and roof-gardens, the children's ward, the private rooms and the social service.

Sub-Committee on Public Wards

MRS. B. DOBSON ALTEMUS, *Chairman.*

MRS. WALTER D. BLABON,

MRS. HOBART A. HARE,

MRS. J. CHALMERS DAcOSTA,

MRS. FRANK G. KENNEDY, JR.,

MRS. FRANK S. EVANS,

MRS. DAVID LEWIS,

MRS. HORATIO G. LLOYD.

The wards have been visited as usual and clothing, ice cream, flowers and magazines have been provided.

Christmas and Easter were made pleasant for those unfortunate enough to be ill at these seasons. A sufficient sum was supplied in order to purchase gifts for the ward patients and employees. Appropriate flowers, wreaths and trees were placed throughout the house and every energy was directed toward bringing sunshine and cheer to our charges. Potted plants have been kept in the halls, corridors and reception halls. These have been replaced by fern stands.

RECEPTION ROOM ON PRIVATE FLOOR

The roof-gardens were again placed in order and made cheerful for the ill and depressed. Flowers and plants were supplied and all the furniture was repainted.

Sub-Committee on Children's Ward

MRS. SIMON GRATZ, *Chairman.*

MRS. B. DOBSON ALTEMUS,	MRS. CHARLES M. LEA,
MRS. DANIEL BAUGH,	MRS. LUCIUS S. LANDRETH,
MRS. HOWARD A. DAVIS,	MRS. ALBA B. JOHNSON,
MRS. E. E. GRAHAM,	MISS ANNA J. MAGEE,
MRS. ROBERT E. HARE,	MRS. PHILIPPUS W. MILLER,
MRS. D. L. HEBARD,	MRS. FRANK SAMUEL,
MRS. ROLLIN H. WILBUR.	

During the summer months ice cream and wafers were furnished through contributions by various members of the Children's Ward Committee. Toys, flowers and fruit were also supplied. Flannel and gingham rompers, children's dresses, infants' shirts, hose and sweater suits, caps and mittens are among the clothing supplied by this committee.

The Christmas and Easter seasons were made very pleasant. To many of the poor children the holiday was the first one that had ever meant cheer and gifts. A more interesting ward is not to be found in the Hospital at all times.

Sub-Committee on Private Rooms

MRS. ROLLIN H. WILBUR, *Chairman.*

MRS. HOBART A. HARE, *Vice-Chairman.*

MRS. HOWARD F. HANSELL.

The Chairman reports the continued excellent condition of the Private Rooms. The popularity of the private floor service is attested by the increased number of private patients cared for each year.

A gratifying comment on the Hospital and private service was made by a prominent ex-Attorney General of Pennsylvania. He spoke of his comfort and happiness during his stay at the Hospital, and showed his appreciation to his attendants by giving two pleasant little "spreads" to the nurses on his floor.

The service has been equipped with necessary china. Hot water dishes and small pillows have been donated.

(MRS ROLLIN H.) NANNIE L. WILBUR,
Chairman.

Social Service Committee

MRS. ALBA B. JOHNSON, *Chairman.*

MRS. DANIEL BAUGH,	MRS. FRANKLIN BAKER,
MRS. HOWARD A. DAVIS,	MRS. EDWIN E. GRAHAM,
MRS. HORATIO GATES LLOYD,	MRS. HOLLISTER STURGIS,
MRS. THOMAS McCRAE,	MRS. JOHN CHALMERS DaCOSTA,
MRS. DAVID LEWIS,	MISS ANNA J. MAGEE,
MRS. FRANK G. KENNEDY,	MISS ALICE GILPIN,
MRS. HOBART A. HARE,	MISS ANNE HINCHMAN,
MRS. PHILIPPUS W. MILLER,	MRS. ANDREW C. CONNELLY,
MISS MARY PEIRCE.	

Report of the Social Service Committee of the Women's Auxiliary

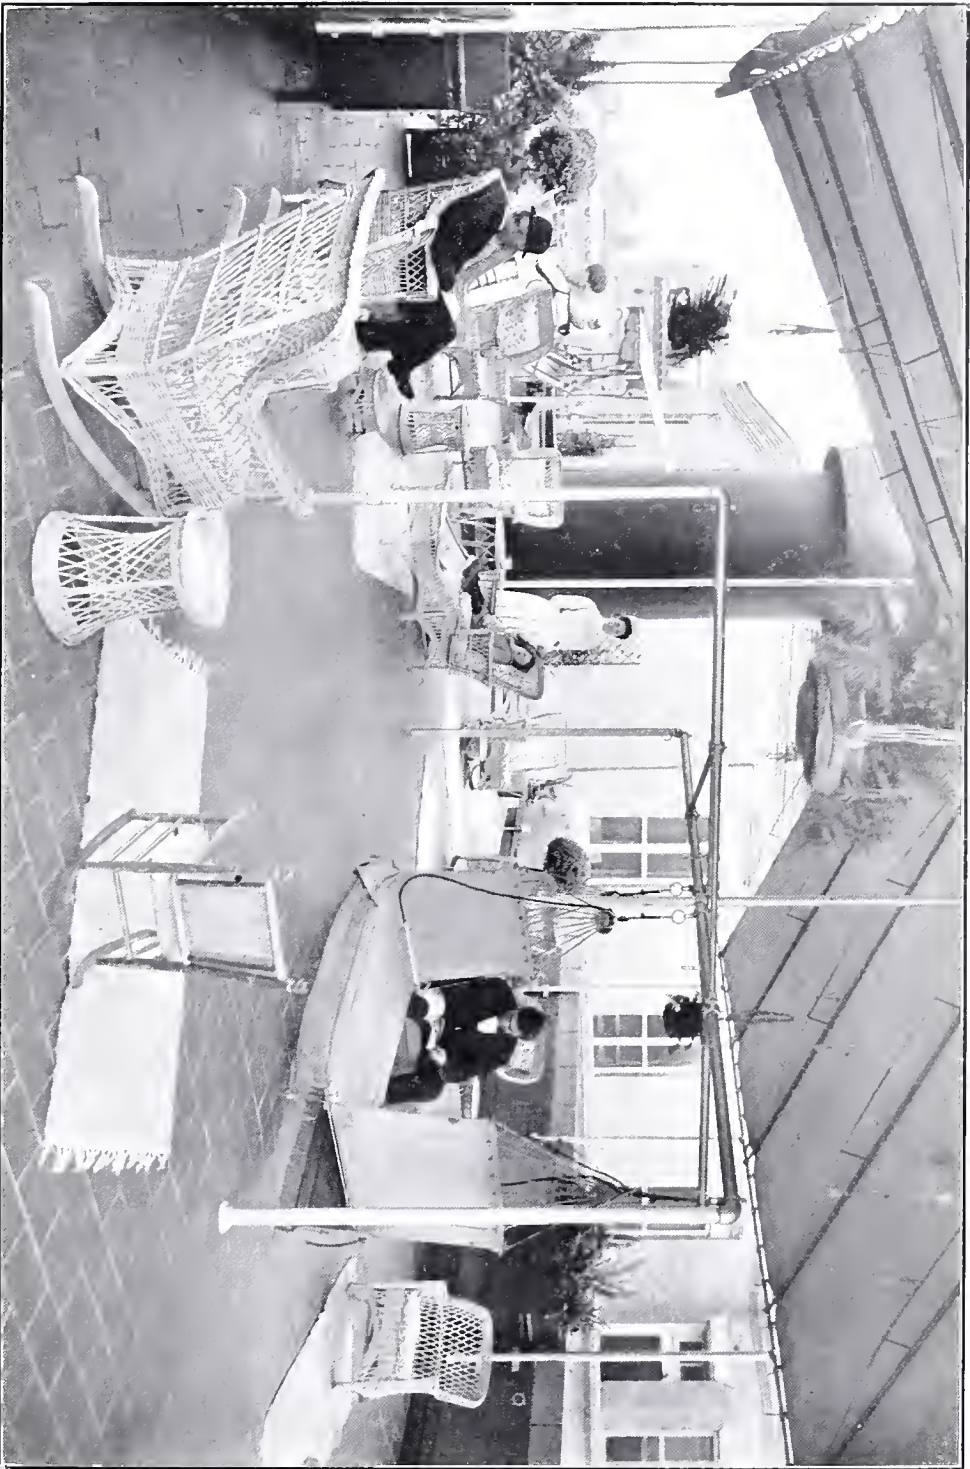

The staff of the Social Service Department now consists of a head worker, four assistant workers and a stenographer. The function of our committee has been to provide the salaries of the children's worker, the stenographer, and, at the May meeting, it was decided to assume the salary of the fourth assistant worker, who has since been appointed.

The committee has also assumed charge of the yard at 238 Pine Street, the Department for Diseases of the Chest. A lattice was erected against the fence, climbing roses planted, evergreens in jars placed around, and an effort made to transform it into a cheerful resting place for the patients.

Contributions have been given toward the relief fund of the Department—a fund used for immediate relief while awaiting the action of the charitable agencies called in to handle the case.

A statement of the scope of the work and its needs was issued by the committee last October, and a most generous response on the part of those receiving it has aided in the efficiency of the work.

The possibilities for the future work of our committee

ROOF-GARDEN FOR PRIVATE PATIENTS

are unlimited, and it is hoped that broadening experience and continued generosity on the part of our friends will render us of increasing value to the Department.

LEAH GOFF JOHNSON,
Chairman.

Nurses' Home Committee

MRS. D. L. HEBARD, *Chairman.*

At Christmas gifts were given to all the undergraduate and head nurses, also the office force and telephone girls—a total of over 150 presents. The Home was decorated with laurel and holly and a large tree. The Directress reported that the entertainment for the nurses on Christmas Eve was a distinct success.

The Nurses' Commencement was held in May in the Hospital Amphitheatre. We had a graduating class of twenty-four and entertained over four hundred and fifty people. The rooms were beautifully decorated and the music good. We wish to thank the ladies of the Board for their generous help.

Our interest in the Chest and Lung Hospital still continues and Mrs. Purviance was elected Chairman of this branch of our work.

A hundred dollars was spent on the Nurses' Outing for the summer months, and we trust the winter's work will be most successful.

(MRS. WILLIAM E. GOODMAN, JR.) ELIZABETH V. GOODMAN,
Secretary.

MRS. PHILIPPUS W. MILLER,
Secretary Women's Auxiliary.

Report of the Treasurer

NOVEMBER 2, 1914.

To the Jefferson Auxiliary:

I herewith submit my report as Treasurer, for the year ending October 31, 1914.

To balance on hand, November 1, 1913.....	\$423.06
" Cash from contributions.....	1,682.00
(\$200 of this advance 1915 payment)	
" Dues and Fines	215.75
" Interest on Bank Balance.....	20.55
	<hr/> \$2,341.36

Payments:

Account Merchandise bought.....	\$1,175.33
Flowers	278.60
Social Service	115.00
Sterilizer	175.00
Sewing	22.36
Printing	9.00
Private Rooms	7.00
Christmas Decorations	50.00
	<hr/> 1,832.29

Balance cash in bank, October 31, 1914..... \$509.07

Respectfully submitted,

GERTRUDE C. EVANS, *Treasurer.*

Maternity Department

Annual Report of the Secretary of the Maternity Committee of the Women's Auxiliary of Jefferson College and Hospital

The Women's Committee of the Maternity Department of the Jefferson Hospital presented their Twenty-second Annual Report. The year 1914 has been an unusually busy one, with many interesting cases, and an increase in the demands for admittance to the Maternity, which could not be gratified because of our very limited space. In January the private room was more than occupied, and on one occasion an effort was unsuccessfully made to put five private patients into two beds, which are available in one room. At such times of overcrowding we have had to utilize beds in the wards, surrounded by screens.

During last November the Trustees assumed the entire responsibility for the maintenance of the Maternity. Owing to the efficiency of our Head Nurse, Miss Martin, the Maternity Department is managed well and economically, and admirable work is done by the nurses.

The usual Christmas fund was applied by the Women's Committee, and the holidays passed most pleasantly, the Hospital furnishing a very good Christmas dinner to the inmates of the Maternity. Christmas money was given by the Women's Committee to Miss Martin, to buy gifts for the patients, for which they were most grateful.

Last March the Committee on Childhood Federation wrote, asking that delegates from the Women's Committee be sent to a meeting which was to be held in the Mayor's Office, the object being to organize a Babies' Welfare Association. Mrs. Fisher and Mrs. Rogers were appointed delegates from the Maternity Committee, and attended the meeting. They reported that the object to be obtained was the establishment of a central office, through which the various charitable and hospital organizations in this city could obtain information concerning the needs of the poor, and mutually help each other in their work.

During the summer the Maternity was overcrowded, which is unusual for that time of the year. In June there were 50 applications for admission, and only 23 could be admitted. In September 77 applied for admission, and out of this number but 28 could be taken care of.

The Pleasure Fund of \$25.00 for the benefit of the nurses working at the Maternity during the warm months, was given to Miss Martin, and also \$25.00 for miscellaneous expenses which Miss Martin might consider advisable.

The Dispensary in Wharton Street is progressing splendidly, and the personal work of Miss Jones, its Visiting Nurse, has done much toward the success of this Department of the Maternity.

For valued co-operation and much appreciated gifts, our thanks are due to the Philadelphia Branch of the Needlework Guild, The Llanerch Branch of the Needlework Guild, and the Ambler Branch of the Needlework Guild, for garments which were of great value to mothers and children, and to the Philadelphia Branch of the National Plant, Flower and Fruit Guild, and the First Presbyterian Church of Philadelphia for flowers.

The Maternity Committee of the Women's Auxiliary of the Jefferson College and Hospital have sustained a great loss in the death of Mrs. Paul Crompton. For years she had been active in work, being instrumental in the establishment of the general Auxiliary Board, and founding the Maternity Dispensary at Wharton Street. She was instrumental in collecting funds for the Institution, and her personal attentions to the patients were greatly appreciated and always welcome. Her tragic death has brought great sorrow to all connected with the Institution.

On motion of the committee, the Secretary sent to Mrs. Crompton's mother, Mrs. Salis, and to Mr. Crompton's brother, Mr. David Crompton, letters of condolence.

MARY B. M. CORYELL,
Secretary.

One hundred and twenty-five articles of clothing given away during the year.

Medical Report of the Maternity Department Jefferson Hospital

For the Year Ending May 31, 1915

SITUATION OF THE MATERNITY DEPARTMENT. The Maternity Department of the Jefferson Hospital (The Jefferson Maternity) is situated at 224 South Seventh Street, near the corner of Locust and Seventh Streets, on West Washington Square. Its telephone is Bell, Walnut 494. The Jefferson Hospital ambulance answers its calls.

The Maternity is open day and night throughout the year to women who are pregnant and ill, or about to be confined, or suffering from the accidents and injuries following confinement, or who desire to consult a physician. Newly born infants not afflicted with contagious diseases are received. Except Sunday, between 12 and 1, midday, members of the staff are present at the Maternity daily to consult with patients who desire attendance in their homes, or wish to enter the Maternity. Emergency cases and patients in labor are received at any time of the day or night.

THE STAFF. The Staff consists of the Medical Director of the Maternity Department of the Jefferson Hospital, Dr. Edward P. Davis; Dr. Stricker Coles, Dr. William H. Wells, Dr. George A. Ulrich, Assistant Obstetricians; Collin Foulkrod, M.D., Francis J. McCullough, M.D., L. Strousse, M.D., H. J. E. Newnam, M.D., W. F. Seabold, M.D., Harry Stuckert, M.D.; the Obstetric Resident of the Jefferson Hospital, and its Staff of Nurses, with Miss Sarah J. Martin as Chief Nurse, and Miss Irene Lesser as Clinic Nurse. In addition to the Jefferson nurses, nursery-maids receive instruction. None but graduate physicians attend patients. Instruction is given to senior students in obstetric clinic, and such students in small groups receive bedside instruction.

THE OUT-PATIENT DEPARTMENT of the Jefferson Maternity carries on its charitable work in the lodgings of the poor, among those who cannot enter the wards. Many married women having children cannot go away from home for confinement, and must receive attention in their houses.

MATERNITY DEPARTMENT
The Nursery

The Staff of the Out-Patient Department consists of the Medical Director of the Maternity, Dr. Edward P. Davis; Dr. George A. Ulrich, 309 South Twelfth Street, Assistant Obstetrician and Demonstrator of Obstetrics; Dr. Collin Foulkrod, 4005 Chestnut Street, Assistant Demonstrator of Obstetrics; Dr. Francis J. McCullough, 1512 South Tenth Street; Dr. H. J. E. Newnam, 258 South Twentieth Street; Dr. L. Strousse, 1730 Tioga Street; Dr. W. F. Seabold, 5617 Spruce Street; Dr. Harry Stuckert, 2116 North Twenty-first Street, Instructors in Obstetrics. Members of the Senior Class are allowed to act as assistants to these gentlemen, and the necessary antiseptics and dressings are furnished by the Maternity. A complete outfit of portable sterilizers and instruments for this work is kept at the Maternity under the care of the Clinic Nurse.

DAILY CLINIC: HOURS FOR ADMISSION: Daily, except Sunday, from 12 to 1, members of the Staff of the Maternity with the Obstetric Resident are present at the Maternity to advise patients and to arrange for their care during confinement. The Medical Director sees cases referred to him at other hours.

In emergencies, patients may receive needed information at any time, and can at any hour of the day or night secure the services of a physician by personal application, or by communicating with the Maternity. Emergency cases are received at any time, and when necessary an ambulance or a physician will be sent for cases requiring immediate help.

THE JEFFERSON MATERNITY DISPENSARY. At 2545 Wharton Street (26th and Wharton) the Maternity Department of the Jefferson Hospital has a Maternity Dispensary. This is in charge of Miss Elizabeth D. Jones, Visiting Nurse. A daily clinic, from 3 to 4 P. M., except Sunday, is held, and advice and help given to pregnant patients, to those who have had children, and to those who wish help in caring for young infants. There are accommodations in the building for two physicians, and two students, acting as assistants to the Dispensary Staff, sleep at the Dispensary to answer night calls and attend cases in the houses of patients.

The Staff of the Dispensary is: Dr. Edward P. Davis, Medical Director; Dr. Francis J. McCullough, 1512 South Tenth Street; Dr. W. F. Seabold, 5617 Spruce Street; Dr. Harry Stuckert, 2116 North Twenty-first Street, Instructors in Obstetrics.

IN-PATIENT AND OUT-PATIENT WORK. The number of cases admitted to the wards of the Maternity varies each year only in proportion with the character of the cases. Where patients are admitted with some serious condition, their convalescence lasts much longer and they occupy space which prevents the admission of other patients. As our space is always in demand, this naturally lessens the number of cases we are able to treat in a given year.

During the past year we have had an unusual number of patients admitted in a serious condition; central placenta previa, infection and injury from repeated attempts at delivery, and cases in convulsions or threatened with convulsions have been brought for our care.

During the past year the number of mothers admitted to the wards of the Maternity was 284, the number of children admitted 22. In the Out-Patient Service, 963 mothers applied for advice or attendance. In the Maternity, 227 children were cared for, and in the Out-Patient Service of the Maternity, 200 children. Total number of patients under the care of the Maternity, 1,696.

During the past year 72 operations of various sorts were performed in the Maternity.

In the wards of the Maternity during the past year occurred seven deaths, two from pneumonia, one placenta previa, one eclampsia, two were dying when brought to the Hospital, and one died from streptococcic septicemia.

Among the complicated cases which proceeded to recovery were placenta previa, eclampsia, hemorrhage, contracted pelvis, and abnormal positions and presentations.

Among those patients who apply, those who seem in normal condition and who can safely do so, are encouraged to remain at home, being attended by our Out-Patient Staff

and Visiting Nurses. Those cases which require especial attention we admit to the wards of the Maternity.

The new sterilizing plant installed by the Trustees, and the Nursery remodeled by the Women's Committee have been most satisfactory and enable us to do our work as well as possible in our present cramped and insufficient quarters. Our sterilizing plant provides not only articles needed for the Maternity wards but also for work in the Out-Patient Department. The separate cribs in the Nursery prevent the spread of infection among infants and have proven most satisfactory in making the work of the nursery-maids more efficient.

THE WHARTON STREET DISPENSARY. During the past year, 441 mothers and 355 children received attention at the Wharton Street Dispensary, the total number of patients treated reaching 796.

Among the mothers most of the confinements were normal, and complicated cases were sent to the wards of the Maternity. There was one maternal death. Five infants died, prematurely born.

VISITING NURSES. Miss Elizabeth D. Jones has been Visiting Nurse for the Wharton Street Dispensary since its establishment. Her services are of inestimable value, not only in the medical work of the Dispensary, but in the general good which she does to the people in its vicinity. She is now recognized as the valued friend of those who live about the Dispensary. An idea of her work may be obtained from the fact that during the month of March, 1915, she made 418 calls, in addition to her work in the Clinic.

Miss Laura Pullen on March 1, 1912, went on duty as Visiting Nurse for the Maternity Department of the Hospital. Her work is attended by considerable difficulty because her patients, many of them, are at great distances from the Maternity. She has been received with great pleasure by the patients, and her work has been of great service to the Maternity. During the month of March, 1915, she made 175 calls.

THE LIMIT OF OUR INDOOR WORK. The limited space at

our disposal has placed a numerical limit on the indoor work of the Maternity. We are obliged to keep this space, as far as possible, for complicated and difficult cases, which especially demand hospital care. We are often obliged to refer others whom we should like to assist, to other hospitals. During the past year many complicated and difficult cases have been brought to us by ambulance at the request of outside physicians. Some of them came to the city from a distance by railway, and some of them were fatally ill upon admission. We have been glad to do our utmost for these cases, although we have not succeeded in all instances in saving lives. The faithful work of the House Staff, and especially its nurses, has prevented the spread of infection from any of these patients. To the uniform excellence of the work done within the Maternity must be ascribed the good health of its patients. We have no fixed time for the discharge of patients, and it is not our effort to have the greatest number of confinements possible, but to secure the best possible result in each case. Many of our patients need prolonged care to complete convalescence, because of their debilitated condition on admission. Until our space is increased we are obliged to select only those cases most deserving of our efforts.

The contrast between the high mortality of the Maternity and the low mortality of Out-Patient service shows the difference between normal cases attended in a clean and careful manner, and complicated cases rendered dangerous through inefficient attempts at delivery without suitable aseptic appliances. None of the deaths in the Maternity occurred among patients whose chance for recovery had not been lessened by inefficient treatment before admission.

The Wharton Street Dispensary gave practical instruction to 116 students during the year, who acted as Assistants to the Visiting Staff. Their work was satisfactory to the patients and of great benefit to the graduating class.

The medical work of the Maternity is of benefit and service to the public in four ways:

First, it affords to poor mothers who have unusual complications and diseases during confinement the advantages of

modern medical science. One can obtain an idea of how great this benefit is when we remember how serious a matter confinement is among the poor, and how especially helpless such women are at this time.

Practical training to physicians in this branch of science is most important. As education advances, the lives and health of patients are benefited thereby.

Practical training for nurses has resulted in a vast improvement in this branch of medicine. One has only to contrast the lack of cleanliness, of thoroughness and knowledge in the old untrained nurses, with the good care of the present day, to appreciate the difference. The Maternity affords unusual advantages for the training of nurses, because it receives so many emergency cases brought by ambulance. Its nurses thus obtain experience not only in usual and normal cases, but in unusual and difficult cases, which makes them especially valuable in assisting physicians in private practice.

THE WORK OF THE MATERNITY FROM ITS SOCIOLOGICAL ASPECT. Our Visiting Nurses have given a new and most valuable impetus to the social work of the Maternity; coming in contact as they do with the poor at times when help is most needed and appreciated, they obtain a personal influence which many others cannot attain. The results of their visits have been most satisfactory and gratifying, and patients have shown their appreciation by uniformly kind and courteous treatment, so soon as the real purpose of the nurse's visits was made known, and often by gifts of carfare, food or whatever the circumstances of the patient permitted. The distrust which foreigners sometimes show, because they do not understand our language, has speedily disappeared when the work of the nurse made evident the purpose of her visit.

They have co-operated with the social workers of the General Hospital, and with various departments of organized charity throughout the city.

Medical training for nursery-maids, like the medical education of nurses, is the substitution of knowledge and discipline for ignorant, haphazard care. As this is the newest

field in our work, it is probably the most difficult to develop, but the results have been so far satisfactory.

Good results obtained at the Maternity in a small, overcrowded building, lacking many of the conveniences of modern hospitals, reflects great credit upon the patience and faithful industry of its nursing staff.

EDWARD PARKER DAVIS,
Medical Director.

The Jefferson Maternity Trained Nursery-Maids

Founded 1895

These maids are graduates of a course of four months' training in the Maternity Department. They are admitted to the course only after a careful examination of their characters, dispositions and physical conditions, and must be not less than eighteen years old.

Their training covers the care of infants of all ages, including older children, and requires neatness, absolute cleanliness and obedience, qualities essential in nursery-maids of a higher order.

Duties of a Nursery-Maid

After a nursery-maid has completed her course of training and has been found thoroughly satisfactory in every respect, and fully competent to take charge of a baby or an older child, she is recommended for a position, on the understanding that she will faithfully perform all her duties and conform to the following regulations:

Among her duties will be: The preparation of the baby's food in accordance with written directions from the attending physician, parent or some other responsible person; the care of the child; the care of the bottles; the washing of the baby's flannels and diapers.

She must wear her uniform, consisting of a wash dress, cap, collar, and apron with strings, bib and straps. The color and material of her dress may be that of a Jefferson trained nursery-maid (blue-checked gingham) or white, at the discretion of her future mistress. The uniform is adopted in order to dignify the position, and to show that the maid has completed a course of recognized training.

Absolute neatness and cleanliness of person is required.

She must understand plain sewing and mending.

The nursery-maid shall not leave a place without giving two weeks' notice and can require the same for herself from her mistress.

The nursery-maid, although receiving her treatment at an authorized training school for nursery-maids, must not forget that she is a maid, though of high class, and must conform to the customs and rules for the maids in the households in which she may be placed, such as eating in the kitchen, taking her day out, etc.

The wages of the nursery-maid shall be twenty-five dollars (\$25) a month, for the first year after leaving the Maternity.

Applications for nursery-maids should be made to a member of the Committee, or to Miss Martin, Head Nurse of the Maternity Department of the Jefferson Hospital, 224 South Seventh Street. If the maid proves satisfactory, a fee of not less than five dollars (\$5) is, at the end of one month, payable to the chairman of the Committee. This fee is for the benefit of the Maternity Department. No fee is charged the nursery-maids.

It is the custom of the Maternity not to give a diploma until a nursery-maid has been one year in private work, and has demonstrated her ability to work successfully in private houses. By this means a record is kept as far as possible.

Since April 15, 1904, total number of nursery-maids trained and on record, 115. Of these, 5 have been dismissed as unfit, 27 are on record as working successfully in private houses at the present time. Several have married, some have other occupation, and some have not reported since leaving the Institution. It is difficult to find reliable and competent young women well fitted for the important and responsible work of caring for young children.

During 1914 there were 98 applications for nursery-maids, and 16 positions filled; 33 young women applied for training; five nursery-maids were graduated, and six graduated nursery-maids returned for new positions.

Mrs. D. M. Barringer, 4 baskets of vegetables.

Mrs. Edward Parker Davis, 6 pounds of butter, 4 dozen eggs, 2 baskets of vegetables, flowers.

Mr. Volk Perkins Slatine, 1 basket of pears, 1 basket of cherries.

The Training School for Nurses

The Training School for Nurses has been in successful operation for twenty-three years; at no time in its history has the school been more prosperous. The entire organization is under the direction of the Hospital Committee, to which, through the Medical Director, all matters of discipline and curriculum are brought for final consideration. Recognizing that proper teaching of the science and art of nursing can be best accomplished under the supervision of medical men, it has been provided that the course of study be formulated and directed by the Hospital Staff. For this purpose there is appointed annually a Committee of the Staff, known as the Training School Committee, consisting of six members, who outline the curriculum and designate the teachers of the separate branches.

The Directress of the Training School is the executive having immediate charge of the work done by the pupils; she supervises the practical instruction in Wards, Operating Rooms, Diet Kitchen and in classes, for which purpose she is supplied adequate assistance. The Nurses' Home is under her immediate supervision, as is also the home life of the pupils in training and all her subordinates.

Course of Study

The course of study is three years, during which time the Directress of the Training School assigns each pupil, for definite periods, to the various wards and services. Such practical training under skilled supervisors best applies the science and most adequately teaches the art. The course of study is modified and improved year by year, always with the idea of betterment. Like all other professional schools, changes are necessary for improvement; to stand still is retrogression. Each year new subjects are introduced or old ones taught in new and, it is believed, better ways. The curriculum embraces a probation term of three months, a junior term of nine months, an intermediate term of twelve months, and a senior term of

twelve months. Practical work is given each nurse in the following:*

Men's and Women's Medical Wards	7 Months
Men's and Women's Surgical Wards	7 "
Children's Ward	4 "
Roof-garden and special details	1 "
Private Corridors	4 "
Accident Ward and Dispensaries	2 "
Operating Rooms	3 "
Maternity Department	3 "
Department Diseases of Chest.....	3 "
Diet Kitchen	2 "

Approximately six months of night duty are given in two or more terms, rarely exceeding three months each, distributed in the above services.

First Year

INTRODUCTORY LECTURE

THE MEDICAL DIRECTOR. The Duties, Obligations, and Responsibilities of the Trained Nurse.

BACTERIOLOGY AND HYGIENE

PROF. R. C. ROSENBERGER. General distribution of Bacteria, how bacteria produce diseases. Epidemics of Diseases due to dissemination by (1) Contact, (2) Water, (3) Milk, (4) Carriers, (5) Insects. Methods of obtaining Antitoxin and other sera, role of Vaccines. Disinfection by steam, hot air and chemicals. Dangers of dusts in various occupations.

NURSING IN TUBERCULOSIS

ELMER H. FUNK, M.D. Tuberculosis—Frequency of infection and mortality, predisposing factors, methods of spread of the disease. The Social problem and the Nurse's position in the anti-tuberculosis crusade. The manifestations of the disease—the special knowledge which a nurse should have to successfully attend tuberculous patients. The temperature, pulse, etc. The care of the patient—rest—fresh air—properly prepared diet. The principles underlying and methods of application of these measures. Prophylaxis. Methods of disposal of sputum, excreta and of disinfection of articles in contact with patient. Nursing in emergencies such as Pulmonary Hemorrhage, etc. The preparation for paracentesis of the Chest.

* Subject to change without notice. The management at all times reserves the right to make such changes as may seem wise without notice to, or consent of the pupil.

ORTHOPEDIC SURGERY

PROF. H. AUGUSTUS WILSON, M.D. Care of Feet and Correct Walking.

PRACTICAL NURSING

Thirty Classes

DIETETICS

Four Demonstrations. Twelve Classes

Responsibility of the nurse in ordering, preparing and serving nourishments and regular diets. Measuring, combining ingredients. Preparation of eggs, of beverages, of nourishments. General rules for diet kitchen work. Care of diet kitchen equipment. Care of trays, linen, china, glass and silver ware. Setting and serving trays. Food. Composition, classification and caloric value. Protein, Fat, Carbohydrate. Mineral Matter. Water. Methods employed in cooking food. Meat—Demonstration of different cuts. Menus for patients on regular and special diets including color schemes. Metabolic diets.

MASSAGE

MARY G. CORBIN. Twenty Demonstrations.

Recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

Second Year

GYNECOLOGY

PROF. E. E. MONTGOMERY, M.D. Consequences and Sequelæ following Abdominal Operation.

PROF. JOHN M. FISHER, M.D. Two Lectures. Abdominal Operations.

P. BROOKE BLAND, M.D. Medical Gynecological Nursing. Nursing in Vaginal Operations.

ALFRED HEINEBERG, M.D. Two Lectures. Anatomy of Pelvic Organs.

DISEASES OF THE EYE

PROF. HOWARD F. HANSELL, M.D. Anatomy of the Eye.

PROF. WILLIAM M. SWEET, M.D. Nursing in Diseases of the Eye.

DISEASES OF CHILDREN

PROF. E. E. GRAHAM, M.D. Feeding in Infants and Children.

JULIUS BLECHSCHMIDT, M.D. Hygiene of the Nursery.

RALPH ENGLE, M.D. Nursing in Gastro-Intestinal and Respiratory Diseases.

JOSEPH FLEITAS, M.D. Nursing in Fevers and Contagious Diseases.

SURGERY

DUNCAN L. DESPARD, M.D. Fractures, Dislocations, Sprains, Anesthesia, Splints.

SURGICAL NURSING

Eight Demonstrations. Preparation of patient for Operation. Preparation of patient for Anesthesia. Instruments (Metal, Rubber, Silk, Glass, Illuminated), Preparation, Sterilization, Use and Care. Sterilizers and how to use them. Preparation of Special Binders, Bandages, Plaster Dressings, etc. Padding of Splints.

BANDAGING

HUBLEY R. OWEN, M.D. Twelve Demonstrations.

ANATOMY AND PHYSIOLOGY

E. J. KLOPP, M.D. Twenty Lectures. Anatomy and Physiology of the Human Body.

MATERIA MEDICA

LEIGHTON F. APPLEMAN, M.D. Drugs: Their Proper Names, Sources and Active Principles. Pharmaceutical Preparation of Drugs with their Definition and General Uses. Dosage and Methods of Administering Drugs. Physiological Actions of Drugs. Poisons; the Treatment of Poisoning. Counter Irritation. Hydrotherapy. Antitoxins; their Uses. Vaccines and their Applications. Review. Materia Medica. Twelve Classes.

Recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

Third Year

SURGICAL NURSING

PROF. J. CHALMERS DAcOSTA, M.D. Two Lectures. Instruments and their uses.

WARREN B. DAVIS, M.D. Four Lectures. Hemorrhage, Wounds and Burns. Shock, Treatment of Shock. Bites of Dogs, Insects and Snakes. Drowning. Asphyxia. First Aid to the Injured.

SURGICAL AND OPERATING ROOM TECHNIC

LOUIS H. CLERF, M.D. Fifteen Classes.

OBSTETRIC NURSING

PROF. EDWARD P. DAVIS, M.D. Obstetric Nursing in Private Houses; Complications of Pregnancy, Abortion, Eclampsia, Hemorrhage. Signs and Symptoms of Labor; Preparation of the Patient and her Room; the duties of the Nurse during Spontaneous Labor.

COLLIN FOULKROD, M.D. Obstetrics, Antisepsis and Asepsis; Signs, Symptoms and Treatment of Post-Partum Hemorrhage. Duties of the Nurse during Obstetric Operations; the Sterilization of Instruments, Dressings, Field of Operation, Operating Tables, the Posture of the Patient; the Anesthetist; Shock and Hemorrhage.

GEORGE A. ULRICH, M.D. The Normal Puerperal State. Complications arising during the Puerperal State for Mother and Child. The Infant, its Food and Dress. Bathing, Exercise, Development and Weaning.

OBSTETRIC NURSING

Five Classes

NURSING IN GENITO-URINARY DISEASES

PROF. HIRAM R. LOUX, M.D. Nursing in Venereal Diseases; Methods to be adopted in Order to Prevent Contagion. Urethral Instruments, Care, Sterilization and Uses. Retention of Urine; Causes, Symptoms and Treatment. Uremia; Causes, Symptoms and Treatment. Hematuria; Causes, Treatment. Catheterism.

E. D. FUNK, M.D. Normal Urine. Deviations from the normal to be noted by the Nurse. Proper Method for collecting samples for Examination. Simple Emergency tests.

FEVER NURSING

FREDERICK J. KALTEYER, M.D. Seven Lectures.

ROSS V. PATTERSON, M.D. Cardiac and Pulmonary Diseases.

MEDICAL NURSING

Sixteen Classes

DISEASES OF THE THROAT

PROF. D. BRADEN KYLE, M.D. Two Lectures. Care of Accident Cases and of Surgical Proceedings involving the Nose, Throat and Larynx.

DISEASES OF THE EAR

PROF. S. MACCUEEN SMITH, M.D. Anatomy of the Ear.

E. L. KLOPP, M.D. Diseases of Middle Ear and Mastoid arising from acute infective diseases.

DISEASES OF SKIN

HENRY K. GASKILL, M.D. Anatomy of the Skin. Suggestions on the care of Diseases of the Skin.

DISEASES OF NERVOUS SYSTEM

GEORGE E. PRICE, M.D. Nursing in Organic Nervous Diseases. Nursing in Insanity. Nursing in Functional Nervous Diseases.

DISEASES OF JOINTS AND APPLICATION OF PLASTER BANDAGES

ARTHUR J. DAVIDSON, M.D. Two Lectures.

Frequent recitations and demonstrations, including practical bedside work, are given by the Directress and her assistants.

During the year just ended twenty nurses completed the course, graduating at Commencement held on May fourteenth. The number of graduates is now three hundred and thirty-seven. On February first, 1915, one hundred and twelve pupil nurses and probationers were enrolled in the Training School.

During the year 685 inquiries were received and 213 applications were filed. The school census follows:

Pupil nurses and probationers, June 1, 1914.....	107
Graduated	20
Resigned and rejected	30
Admitted	56
Pupil nurses and probationers, May 31, 1915.....	110

Nurses' Home

The Nurses' Home, in addition to the dormitories, provides recitation, recreation, reading and reception rooms. Under proper regulations nurses are permitted to see and entertain their friends, enjoy social evenings, and every effort is made to secure something of home life and the pleasures of congenial companionship. A Committee of the Women's Auxiliary regularly visits the Home, provides comforts, and looks after the general welfare of the pupils. The social features of last Commencement were entirely under the direction of the Nurses' Home Committee of the Women's Auxiliary, to whom all were indebted for a most enjoyable occasion.

A Register of the Graduates of the Nurses' Training School is kept in the office of the Directress, and nurses are supplied on application by telephone, mail or in person. Alumnæ are requested to keep the Directress informed as to their addresses, and whether engaged in or desiring private or institutional nursing or administrative work.

Applicants for admission to the Training School should call upon or address the Directress of the Training School for Nurses, Jefferson Hospital.

REAL ESTATE TRUST BUILDING, PHILADELPHIA, July 17, 1915.

We hereby certify that we have audited and examined the books and accounts of the Jefferson Hospital for its fiscal year ended May 31, 1915, and found them to be correct.

The operations of the year are correctly summarized in the report herewith submitted.

JOHN HEINS & CO.,
Accountants and Auditors.

Year	No. of Patients Admitted to Hospital	Patient Days Treatment	Cost Per Diem Provisions All Persons Supported	Cost Per Diem Ward Patients

Contributions other than Cash

(June 1, 1913, to May 31, 1915.)

Mrs. B. Dobson Altemus supplied, through funds collected, the following: Easter and Christmas decorations for the Hospital; six crystal candle shades; eighty-four wrappers; thirty-six pairs of sandals; six steamer rugs; one dozen rocking chairs with arms and one dozen rocking chairs without arms; one dozen large and one small papier mache vases; ice cream for ward patients; clothing, flowers and magazines; money given in order that convalescents might be sent to the country and seashore; plants for halls, corridors and reception rooms; plants for Roof-Garden and box and cedar trees for Pneumonia Roof-Gardens; Christmas gifts for patients and employees.

Art Club of Philadelphia, magazines.

H. R. Austin, flowers.

Miss Baileul, post card album and cards for Children's Ward.

Oliver H. Bair, flowers for Wards.

Mrs. T. B. Baldwin, six sacques and six caps.

Mrs. D. M. Barringer, two pairs shoes; two shirts; three overcoats; one short coat; one suit clothing; thirteen pairs socks; one pair fur house slippers.

Mr. H. H. Battles, two vases American Beauties and two vases carnations.

Mrs. Daniel Baugh, four pairs sandals.

Theodore F. Baulig, twenty-six flannel pajama suits and four dozen children's nightgowns.

Miss Florence Bell, vases for Wards.

Mr. Samuel Bell, chrysanthemums for Wards.

Mrs. E. L. Blabon, clothing.

K. B. Bretzfelder, flowers.

The Century Flower Shop, one dozen bunches of arbutus; shamrocks; flowers for Children's Ward.

Miss Chamberlaine, magazines.

The Church of the Ascension, making of 836 towels and three dozen aprons.

Church of St. John the Evangelist, flowers for Wards.

Church of St. Luke and the Epiphany, making of 1,700 towels and four children's gingham aprons.

Mrs. Clear, flowers.

Mr. Robert Coane, flowers.

Gifts by Will

In the State of Pennsylvania, testamentary provision for a charitable institution must be by a will made at least thirty days prior to the decease of the testator. The signature of the testator must be attested by at least two subscribing witnesses, who should sign their names as witnesses thereto in the presence of the testator and of each other.

None of these witnesses should be interested in any manner in the institution intended to be benefited, as manager, trustee, officer, employee, beneficiary or otherwise.

The testator may either bequeath personal property or devise real estate to the institution generally, or may create an endowment whereby only the income therefrom shall be used for its benefit.

The following forms are suggested for a legacy of personal property and a devise of real estate, where it is intended that the same shall be devoted to the use of the Hospital generally without restriction:

FORM OF BEQUEST OF PERSONAL ESTATE

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the maintenance, extension or betterment of its Hospital Department, the sum of..... dollars.

FORM OF DEVISE OF REAL ESTATE

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the maintenance, extension or betterment of its Hospital Department (here describe the property).

If the testator shall desire to limit the use of the legacy or devise to a particular purpose, the following forms are suggested. Such purpose can be indicated by suitable designation to be added after the words "Hospital Department."

FORM OF BEQUEST OF PERSONAL PROPERTY

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the benefit of its Hospital Department (here indicate the purpose) the sum of..... dollars.

FORM OF DEVISE OF REAL ESTATE

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the benefit of its Hospital Department (here indicate the purpose) (here describe the property).

If the testator shall desire that the legacy or devise shall create or form part of an endowment for a general or a special purpose, and only the income thereof be used for the benefit of the Hospital, the following forms may be found helpful. The purpose desired can be added after the words "for the endowment of."

FORM OF BEQUEST OF PERSONAL PROPERTY

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, the sum of.....dollars for the endowment of

FORM OF DEVISE OF REAL ESTATE

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns (here describe the property) for the endowment of

Among the purposes for which endowments are desired are the following:

Hospital Department.

Rooms in the Hospital.

Any of the Wards of the Hospital Department and beds therein.

Maternity Department of the Hospital and rooms, wards and beds therein.

Children's Department of the Hospital and beds therein.

Social Service of the Hospital Department.

Operating Rooms in the Hospital.

Laboratories in the Hospital.

Departments of Research in the Hospital.

Dispensaries in the Hospital.
